

**MEET THE CHARACTERS**

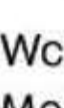

**WAKUDON**  
 **29.02**

Wakudon is a species found in the depths of lunar craters and can only be found roaming at night. This particular Wakudon has been spotted during the day wearing sunglasses...

ワクドン

**WcDIZER 3000**  
 **31.03**

WcDizer 3000 is the Moon-Base WcDonald's trusty mecha, a large robot piloted by the crew. Underneath hardware lies a soft heart—when WcDizer is on autopilot, you might catch 'em stargazing until 3 AM.

ワクダイザイザイ3000

**WICKE**  
 **10.04**

Wicke keeps the vibes fresh even during high-pressure shifts at the Moon-Base WcDonald's. She transforms the kitchen into her stage during breaks (using Quart Sr.'s spatula as her mic) and ends shifts on a high note by sharing a new WcDonald's fun fact.

ウィッカ

**YARUTOKYA**  
 **14.02**

Sent on a mission by WHQ to beta-test WcDizer 3000 on the moon, Yarutokya records atmospheric data to optimize the mecha's lunar mode. If you see a blur of neon lights, don't worry, it's just Yarutokya speeding his way to his next odyssey.

ヤルトキヤ

**YARUZO**  
 **26.05**

Working at the Moon-Base WcDonald's can bring unpredictable events, but Yaruzo is always ready to lead the team. In his downtime, he boulders on moon craters and holds sci-fi movie marathons (his watch was a gift from the set of *Return of the Star WcDonald's!*).

ヤルゾー
