# Make your own 3D Spider!

Adult supervision required

- 1 Ask an adult to use scissors to cut along the dotted lines.
- 2 Fold along the straight, solid lines between all of the boxes and the boxes and the tabs. With an adult present, use a glue stick to stick the tabs to the box to assemble it.
- 3 Ask an adult to cut out the spider legs, making sure to fold on the straight lines on these too.
- 4 Use a glue stick to stick these onto the three way lined boxes on either side of the spider's body.
